PROJECTS

SPAN — Civil Engineering Brand & Website Case Study

Full design-to-development pipeline for a fictional civil engineering company

- Led the complete process end-to-end: wireframing, brand identity, style guide, hi-fidelity mockups, and a written case study documenting the design decisions.
- Currently building the live site from the approved designs using hand-coded HTML, CSS, and JavaScript.

RE Umbrella Database — HTML, CSS, JavaScript

github.com/jobrophoto/umbrella-database | [Live site](#)

- Built and deployed a multi-page web database for the Resident Evil universe, featuring individual creature and virus profile pages with a structured information architecture.

Jobro Photo Design — Portfolio Site — HTML, CSS, JavaScript (hand-coded)

jobrophotodesign.com

- Designed and hand-coded a personal portfolio and branding site from scratch; currently in active development.
